
Statistics 497: Directed Individual Study or Research

Students who are involved in an individual study or research may gain 2-4 course credits by enrolling in this course and producing, under the supervision of a faculty member, a substantial paper, project or presentation relating to or arising from the study, research or project. This paper must be separate from the written thesis required for graduation. When selecting the number of units, please keep in mind that UCLA's unit value is 3 hours per unit. For example, if a student is enrolled in 2 units, it means they are investing up to 6 hours of work per week toward the study, etc.

Name: _____

Quarter/year : _____

Units: _____

Instructor or Faculty advisor: _____

Description of Research/Study/Project: *Give a brief description of the research or study and the statistical methodology that will likely be used (e.g., EDA, modern regression):*
